

12 or 15 Needle Single Head Embroidery Machine Auxiliary Device

hermann

HEC-1501D-AT
Auxiliary Device

Main Features and Functions:

- The HEC-1501D-AT device has the largest sewing fields in the industry: 120x35CM or 48"x14".
- Fit on all Hermann 12 and 15 needle single head machines.
- Allow Hermann Customers to get the markets that others can not, which means more profit for Hermann customers.
- Perfect for oversize items such as pageant wears, table runners, drapery, blankets, banners, mattress borders, religious costumes, saris, wedding dresses, veils, quilt covers and large preassembled pieces.
- The pantograph is easily attached to the machine and can be easily interchanged with regular pantograph.
- Maximum speed with regular pantograph 1200 SPM.
- Recommended maximum speed for the HEC-1501D-AT pantograph 700 SPM.
- Clips are included with the aluminum frame to secure materials.
- Floor support to stabilize any operation.
- More versatility-less rehooping.
